EDUCATION

Columbia University in the City of New York

New York, NY

M.S. in Business Analytics

Aug 2025 – Present

- **Relevant Coursework:** Optimization Models, Data Visualization, Growth Strategy, Digital Marketing.
- **Course Assistant, Analytics & Performance Metrics:** coach 60+ graduate students on KPI frameworks, A/B testing, and structured problem-solving.

NMIMS University

Mumbai, India

B.Tech. in Computer Engineering

July 2021 – May 2025

- **Relevant Coursework:** Data Science, Robotic Process Automation, Workflow Optimization, Research Engineering.

EXPERIENCE

Data & Research Analyst Intern

New York, NY

Women's World Banking

May 2026 – Present

- Gathered reporting requirements from program and partnership stakeholders across 15+ financial inclusion initiatives, translating ambiguous business questions into defined metrics and analysis scope that informed program strategy.
- Cleaned and segmented large-scale World Bank Findex financial-inclusion survey microdata in Python by income quintile, geography, and age cohort, resolving data quality issues before analysis.
- Built **Tableau and Power BI dashboards** surfacing customer segments and adoption drivers, enabling self-service access to metrics previously compiled by hand.
- Presented findings and recommendations to cross-functional and executive stakeholders, tailoring the level of technical detail to each audience.

Business Analyst – Columbia Live Client Engagement

Remote

The GroopL (Early-Stage SaaS)

Feb 2026 – Mar 2026

- Automated a manual reporting process by building a **Python pipeline integrating Meta and Google Ads data** into Tableau and Looker Studio, delivering weekly performance reporting to the founding team without manual assembly.
- Defined the KPI framework for customer acquisition and analyzed 3,200+ sessions of behavioral data to identify conversion drivers, informing a four-week initiative that drove 120 incremental signups and reduced cost per acquisition by \$14.

Product Manager – Internal Tools & Analytics

Mumbai, India

Ashwamedh Infotech

May 2024 – Apr 2025

- Conducted stakeholder interviews across design, engineering, and business teams to **document business requirements** and translate them into a prioritized technical roadmap, delivering a full website rebuild from concept to deployment.
- Analyzed business process workflows to identify inefficiencies and automation opportunities, building internal tools and dashboards across Excel, Tableau, and Laravel that replaced recurring manual work.
- Partnered with distributed development teams to triage defects and usability issues, driving a **12%+ increase in inbound inquiries** within one month with sustained growth thereafter.

TECHNICAL PROJECTS

Pipeline Conversion & Drop-off Analysis | SQL, SQLite, Python, Pandas

Apr 2026 – May 2026

- Designed a relational schema and wrote **multi-stage SQL queries** to model a 500-record pipeline across six cohorts, computing stage-level conversion rates to isolate the primary source of drop-off.
- Identified the conversion bottleneck at 33% across five of six cohorts and quantified a **5×** performance gap between acquisition channels, driving recommendations on qualification criteria.

Open Source Contribution – pandas | Python, Data Integrity, Regression Testing

May 2026 – Jun 2026

- Identified that a merged fix for MultiIndex datetime64[ns] serialization (GH#63078) had shipped without a regression test or changelog entry; authored both and merged a 7-commit PR (#65983) reviewed by a core maintainer.

Controlled Experiment – User Onboarding | A/B Testing, Statistical Analysis, Qualtrics

Aug 2026 – Present

- Designed and analyzed an A/B experiment (n=202) in Python, isolating a ~60% engagement lift in one user segment and a negative effect in another, evidence that reversed the initial product recommendation.

TECHNICAL SKILLS

BI & Reporting: Power BI, Tableau, Looker Studio, Advanced Excel (pivot tables, lookups), Dashboard Design, KPI Definition
Programming & Analytics: Python (Pandas, NumPy), A/B Testing, Cohort & Funnel Analysis, Statistical Analysis, Git
Databases & Querying: SQL (joins, CTEs, window functions, aggregation), SQLite, Snowflake, Relational Data Modeling, ETL, Data Cleaning & Validation
Business Analysis: Requirements Gathering, Process Mapping, Stakeholder Management, Technical Documentation, Ad-Hoc Reporting, Workflow Automation
